**EDA Northern Michigan and Eastern Upper Peninsula
Knowledge Economy Strategies Project
Co-Learning Report Series**

In October 2008, the Michigan State University Center for Community and Economic Development (CCED) initiated a project with the support of the U.S. Department of Commerce Economic Development Administration (EDA) to develop innovative economic development strategies with three Northern Michigan regional planning partners: the Eastern Upper Peninsula Regional Planning and Development Commission (EUPRPDC), Northeast Michigan Council of Governments (NEMCOG), and Northwest Michigan Council of Governments (NWMCOG). The goal of the project is to create new knowledge-based economic opportunities in the regions and to successfully compete in the global knowledge economy.

An assessment of each region's Comprehensive Economic Development Strategy (CEDs) identified strengths, weaknesses, and opportunities, and helped each region to develop their collaborative learning (co-learning) plans. Co-learning plans are designed to provide regional planners and their stakeholders with relevant new knowledge, focus, and capacity. This new knowledge and capacity serves as a platform for regional planners and stakeholders to create innovative regional economic development strategies focused on competing in the global knowledge economy. By understanding the dynamics and demands of global knowledge economy forces, regional leaders can better align their regional investment priorities with those demands.

This report was produced as part of the development of a co-learning plan in response to a request for information on exporting opportunities by the EUPRPDC.

Companies Engaged or Interested in Exporting in the Eastern UP and Northern Michigan and Exporting Resources for Small and Medium Businesses

July 10, 2009

This paper describes the objectives, methods, analysis, sources, exporting resources for small- and medium-sized businesses, as well as a preliminary list of exporting companies in each region.

Objectives

- 1-Identify exporting businesses and companies in the eastern UP.
- 2-Provide information that can be used to expand exporting opportunities for eastern UP companies.

Methods

Preliminary exporting data was obtained from the Michigan Economic Development Corporation (MEDC) Export Connection (<http://ref.michigan.org/medc/export/>). MEDC lists companies by industry, and each industry was searched for companies located in the Eastern UP. Companies are listed in alphabetical order with the company's location and products. In some cases, www.manta.com was used as a supplemental source of information when MEDC data was insufficient. Data was also obtained from company web sites.

As MEDC identified just two exporting companies in the EUP, that data seemed incomplete, especially in light of determining that the MEDC data was last updated in 2006.

A list of 11 EUP manufacturing companies was also provided by the EUPRPDC and the Sault Ste. Marie EDC in response to CCED's request. Preliminary data on the 11 EUP companies was obtained through a web-based search, and indicated that these 11 companies represent a diverse range of advanced and specialty manufacturing applications.

CCED staff designed a short survey instrument and conducted a telephone survey of nine of those 11 EUP manufacturing companies July 2 and July 6. The survey was designed to identify exporting companies, exported products, and the countries they export to. For non-exporting companies, survey questions were designed to determine whether those non-exporters are interested in seeking export markets and whether those companies need any assistance to enter export markets.

Data for each exporting company includes:

- Address
- Number of Employees
- Year Established
- Products
- Countries Exporting to (or where the company is interested in exporting)
- Export Sales as Percentage of Total Sales

Based on MEDC and the CCED survey data, information is provided for 54 exporting companies. Data are incomplete for 27 companies.

The companies in the list below are arranged alphabetically for each region.

Analysis

CCED conducted a brief survey of 16 EUP companies to generate current exporting data. The preponderance of information here was obtained from three-year old data in MEDC's Export Connection.

CCED's EUP survey identified seven exporting companies in addition to the two companies listed by MEDC (of those, one expressed interest in exporting rather than reporting current exporting). Five companies expressed interest in entering export markets, and three were unsure. Only one company that does not currently export is not interested in doing so.

At least two EUP exporters produce highly-sophisticated medical/surgical supplies. Both exporters collaborate with their end-market customers in designing products tailored to meet their customers' needs. This high-end medical/surgical niche market may represent an expansion opportunity in the economic sector.

Pro Bono Business Services**

MSU's Eli Broad College of Business is implementing a pro bono program for **businesses in the Greater Lansing Region** which are striving to engage in the global marketplace. The program involves students in the Broad School along with faculty and staff and the focus is on increasing the region's international competitiveness. Each year, IBC offers this service to a select number of local firms based on a match of the center's expertise, the needs of the firms, and the opportunities that exist. IBC offers a variety of products, such as training programs, benchmarking of global value chains, and diagnostic tools. Typical tasks the faculty and staff engage in are information generation, information dissemination, and information interpretation. Up to 10 hours of research assistance involving a globalEDGE Business Team of one to five members for each organization will be made available at no cost. Additional research assistance is available in most cases for a fee.

Breaking into the Trade Game: A Small Business Guide to Exporting, 4th Edition

http://www.sba.gov/idc/groups/public/documents/sba_program_office/oit_bitg4th_full.pdf

This publication begins with basic information about making the decision to start exporting—the advantages and disadvantages. It includes a workbook to help businesses to evaluate their commitment to exporting, assess their products' potential for the global market, better manage their international operations successfully, and communicate business ideas to people outside the company. The guide then identifies agencies and resources that can help businesses find public and private sector partners, training and research assistance, information about countries they may be exporting to, and overseas market information (both federal and non-federal resources). It also includes a chapter on export financing: how to make sure the business gets paid; the differences between services and lending; private and government export financing resources; and SBA loan programs. This guide appears to be an excellent primer on exporting for small and medium businesses.
